Caring for your Hardwood and Laminate Floor

Here are a few basic guidelines to keep your floor looking great:

- › Never use a steam cleaner on any timber or laminate floor.
- › Don't be tempted to wet-mop your floor. Use a spray-on cleaner with a well wrung out mop. Better still, use a mop with an integrated spray applicator.
- › Only use a dedicated floor cleaning product, do not use abrasive cleaners or washing-up liquid. We recommend Floorservice Parquet Cleaner. (available to buy at mulveys.com)
- › Use the brush attachment of your vacuum cleaner to keep your floor free from grit and dirt. Build-up can act like sandpaper and dull the surface of your floor.
- › Clean up spillages promptly.
- › Make sure all your furniture has felt pads or castor cups fitted.
